

JAVASCRIPT IS WEIRD!

```
const Animal = function() {  
  this.toString = function() {  
    while(true) {  
      console.log('why?')  
    }  
  }  
}
```

```
const x = new Animal()  
  
x + 1
```

When does this diverge:

[illegible]

```
const Animal = function() {  
  this.toString = function() {  
    while(true) {  
      console.log('why?')  
    }  
  }  
}
```

```
const x = new Animal()
```

```
  x + 1
```
